## PROFESSIONAL SUMMARY

WordPress Developer with 1.5+ years of professional experience independently designing, developing, and deploying 10 production websites for UAE-based businesses. Expert in custom WordPress theme and plugin development, PHP customization, REST API integration, and Advanced Custom Fields (ACF). Proficient in DNS/domain infrastructure management — achieving 100% email deliverability across 10 client domains. Skilled in on-page SEO, Core Web Vitals optimization, and responsive design, delivering ~30% faster page load times and Google Page Speed scores improved from 55 to 80+. Experienced with Gutenberg block editor and cross-browser compatibility testing.

## TECHNICAL SKILLS

**WordPress:** Custom Theme Development, PHP (functions.php, hooks/filters), Custom Post Types, Short codes, WooCommerce, ACF, Elementor, Gutenberg, WP-CLI, Child Themes

**Frontend:** HTML5, CSS3, JavaScript (ES6+), Responsive Design, Cross-Browser Testing

**Backend & DB:** PHP, Python, Django, MySQL (schema design, relational queries, optimization)

**APIs & Integration:** REST API, WordPress REST API, RESTful API integration

**Infrastructure:** DNS (A / CNAME / MX / TXT), cPanel, SPF / DKIM / DMARC, SSL

**SEO & Performance:** On-Page SEO, Core Web Vitals, Schema.org, Semantic HTML5, Page Speed Optimization

**Dev Tools:** Git, GitHub, VS Code, Google Analytics, Google Search Console

## WORK EXPERIENCE

**WordPress Developer** | [GNEXT LLC](#), Abu Dhabi, UAE

*Aug 2024 – Present*

- Designed, developed, and launched 10 production WordPress websites for UAE-based clients as the sole developer — each delivered within a 3-to-4-week timeline from brief to go-live.
- Built custom WordPress themes using PHP, CSS3, and JavaScript with responsive design and cross-browser compatibility across Chrome, Firefox, and Safari.
- Integrated WordPress REST API for dynamic content and third-party service connectivity across multiple client projects.
- Configured full DNS infrastructure — A, CNAME, MX records, SPF, DKIM, and DMARC policies — across 10 client domains via cPanel, achieving 100% email deliverability on initial deployment.
- Optimized on-page SEO strategy — semantic HTML5 markup, meta optimization, structured data (schema.org), Core Web Vitals tuning — improving average Google Page Speed scores from 55 to 80+.
- Managed complete SDLC independently: requirement gathering, wireframing, PHP/frontend development, MySQL schema design, Git version control, and deployment.
- Performed Gutenberg block editor customization and ACF field configuration for client-editable content structures.

## KEY PROJECTS

**valloauto.ae — Automotive Dealership** [valloauto.ae](#)

*3 weeks | Solo*

- Built vehicle listing pages with Advanced Custom Fields, Google Maps integration, and WhatsApp enquiry routing; achieved Page Speed score of 80+.

*Stack: WordPress, PHP, ACF, CSS3, Elementor, All-in-One WP plugin.*
